

**Customized
Energy Solutions**

Cut Energy Costs. Support the Grid. Get Paid.

Real-Time Insights. Streamlined Compliance. Smarter Energy Credit Management.

Customized Energy Solutions (CES) empowers businesses with Demand Response (DR) solutions that optimize energy use and provide financial rewards. Our clients achieve energy cost savings through strategic DR actions when the markets offer economic incentives to reduce consumption. These strategies not only help control costs but also support a more reliable electric grid and a more efficient energy system.

In addition to DR solutions, we offer Peak Load Management (PLM) strategies that help reduce transmission and capacity demand charges by targeting energy reduction during periods of highest demand on the transmission system. Together, our DR and PLM solutions create a comprehensive approach to energy cost reduction.

How It Works

2. Enrollment:

Join the program with a customized energy reduction plan.

4. Response:

Reduce energy consumption as planned during peak periods.

1 Evaluation:

CES assesses your energy usage and energy consumption curtailment capabilities.

3. Notification:

Receive alerts when a DR or PLM event is scheduled.

5. Compensation:

Earn financial rewards by lowering energy expenses.

Why Choose Us? Our 24/7 Market Operations Center Ensures Seamless Real-Time Monitoring and Response

- We leverage deep expertise in energy markets to deliver impactful Demand Response and Peak Load Management services.
- Our team manages over 550 generation assets and 30,000 MWs of generation capacity.
- We prioritize transparency—so you always know what to expect from our programs.
- We tailor strategies to match your unique operational needs, ensuring minimal disruptions while maximizing benefits.
