Please visit www.ces-ltd.com/generation for more information.

Power and Generation Management Services for all types of assets and load across all the ISO's/RTO's in the United States and IESO in Canada.

WHY CES?

- CES manages over 500 assets and ~28,000 MWs of generation
- CES manages wholesale activity for a portfolio of retail electric providers (REP), large-corporates and industrial loads
- CES supports all generation asset types (wind, solar, storage, storage hybrids, hydro, thermal etc.)
- CES Gold is our cloud-based software solution which allows clients instant access to key data and customized reports
- Experienced regional market experts and operators focused on our clients' needs
